WORK EXPERIENCE

HAYRAT R&D. (6 employee venture-backed recruitment startup)   Isparta
Software Engineer Intern   Jun 2022 – Sep 2024
- I have taken many tasks in the web project of a charity organisation, I have gained experience about project structure, how to work in a real life project and payment systems.
- I took part in a competition project considering performance under heavy load. I experienced techniques that can be applied under load and to develop performance-oriented projects.
- I have experienced and developed projects using image processing and OCR technologies
- I took part in a project that uses zoom infrastructure and you can manage courses. I experienced working with different infrastructures and applying them to the project
- A project with a design and admin panel where you can enter and display different types of resources. It was the first time I experienced a project from start to finish with different languages and frameworks.
- I took part in an application where you collect posts and videos from different platforms on a single platform. With this project, I experienced how to integrate different apis into the project and manage different resources.

PERSONAL/UNIVERSITY PROJECTS

Bitwarden Share: I developed an application where I share my passwords over my own domain using the send feature of bitwarden, a password manager. With this project, I was able to experience and practice docker, docker swarm and ci-cd processes.
Akıllı Plan: I am developing an artificial intelligence supported application that will provide educational coaching to YKS students.
Hastane Otomasyon Mauı App: This is the first project where I experienced the maui framework for the first time.
Py Hotel Rezervasyon: It is the first time I experienced the django framework.
Booking: It is the project where I apply frontend design and develop my skills
Instagram Clone: Instagram clone project I made with the aim of developing my design skills
Telegram Bots: Multiple telegram bots I have written that serve different purposes
Hackerrank Solutions: Github repo where I solved hackerrank problems
Homeworks: Github repository with my assignments
C Programming Language 2nd Solutions: The github repository where I solved the exercises in The C programming language book
